

FUND OBJECTIVE & STRATEGY

The Future Titans Prescient Fund has a flexible mandate to invest in a range of asset classes but will typically have high exposure to companies outside of the Top 40 Index. The fund is permitted to invest 25% offshore plus an additional 5% in Africa. The primary objective of the fund is to achieve real long-term capital growth ahead of CPI + 6%. The fund looks to acquire fast growing, mispriced, mid-and small-cap shares, "Future Titans", on the back of high conviction

Portfolio Managers:	Brendon Hubbard
Inception Date:	01 September 2009
Fund Size:	296.4
Unit Price:	249.21
ASISA Category:	South African - Multi Asset - Flexible
Benchmark:	CPI Upper Limit
Min lump Sum:	20,000
Min monthly investment:	1,000
Issue Date:	10 April 2017

CUMULATIVE PERFORMANCE SINCE INCEPTION

WHO SHOULD INVEST

The fund is a high risk, high return fund and should be invested in as a complementary investment to any long-term blue-chip portfolio.

RISK INDICATOR

These funds typically exhibit more volatility given their higher exposure to equities and offshore markets where currency fluctuations may result in capital losses. Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

NET PERFORMANCE

Period	Fund	Benchmark	Peer Group
1 month	-2.9%	0.5%	1.2%
6 months	4.4%	3.0%	0.8%
12 months	-1.1%	6.0%	2.1%
3 years, annualised	-0.1%	6.0%	5.8%
5 years, annualised	10.2%	6.0%	9.9%
Year to Date	1.5%	1.5%	2.3%
Percentage positive months	67.0%	100.0%	65.9%
Annualised since inception	12.8%	6.1%	10.5%
Highest rolling 1-year return*	35.0%	6.0%	21.3%
Lowest rolling 1-year return*	-12.8%	6.0%	-1.1%

*Since inception

MONTHLY COMMENTARY

The Future Titans fund was down 2.86% for the month primarily driven by two key factors - Cabinet reshuffles of ministers with good track records and infighting within the ruling party, neither of which are good for investor sentiment, sent the domestic facing stocks down for the month; and the poorly executed Dawn rights issue which led to a 50% fall in the share price over the month. The Dawn management team are currently forecasting a full year EPS of 20c to March 2018 - implying a very cheap, 5x PE multiple relative to its 10 year average of 16x. We believe Dawn will either be broken up into three companies and sold off or bought by the Japanese giant Lixil who have already purchased 50% of the GDW division implying potential upside from current levels.

Interwaste released solid earnings growth of 29% for the year on continuing operations. Importantly, we are looking for another 30% growth this year putting the company on a 7.7x multiple versus its 10 year average of 12.6x. Interwaste's FG site in Midrand has received some negative press given residents discontent with its smell. The FG site is not only compliant with SA and European regulations but is also the only landfill in SA with European TUV OHSAS18001 accreditation.

Metair released better than expected earnings with the Toyota Hilux and Fortuner model changes now behind them. Importantly, the battery business continues to grow nicely and we are forecasting a forward PE ratio of 8x versus the 10 year average of 11.1x.

FEE STRUCTURE

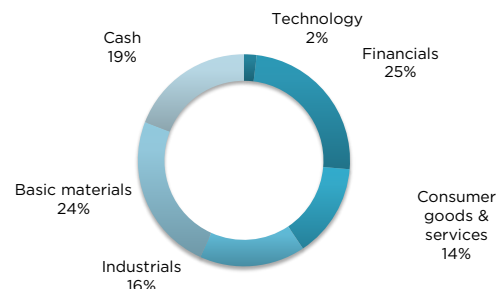

TER	Class A1
Annual Management Fee (excl. VAT)	1.30%
Other Cost	0.03%
VAT	0.20%

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs(TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
