

**FUND OBJECTIVE & STRATEGY**

The ClucasGray Global Flexible Prescient Fund aims to provide medium to long-term capital and income growth over time by investing in a flexible portfolio of global asset classes and currencies. The Fund will invest in a diversified mix of global assets, including equities, bonds, property, preference shares, debentures, fixed interest securities and money market instruments. The Fund will employ asset and geographical allocations to reflect changing economic and market conditions to maximise returns over the long term.

**FUND INFORMATION**

Portfolio Managers:	Guy MacRobert & JP Maritz *
Inception Date:	31 January 2020
Fund Size (ZAR millions):	74.70
Unit Price:	108.69
ASISA Category:	Global Multi-Asset Flexible
Benchmark:	Market value-weighted average return of ASISA category
Min lump Sum:	R10 000
Min monthly investment:	R1 000
Issue Date:	03 July 2020

\* Under Supervision

**WHO SHOULD INVEST**

The fund is an ideal wealth creation vehicle for investors with a medium to long-term investment horizon.

**RISK INDICATOR**

These funds typically exhibit more volatility given their higher exposure to equities and offshore markets where currency fluctuations may result in capital losses. Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

LOW	LOW - MED	MED	MED - HIGH	HIGH
-----	-----------	-----	------------	------

**CUMULATIVE VALUE OF R100 INVESTED AT INCEPTION VS PEER GROUP (ILLUSTRATIVE PERFORMANCE)**

The illustrative investment performance is shown for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

**MONTHLY COMMENTARY**

Global equity markets ended what has been a very volatile first half of 2020 on a positive note, with all major indices moving higher during June but, with the exception of the Nasdaq, global markets are still negative year-to-date. Markets looked past poor economic data as well as ever increasing social tensions, focussing instead on the reopening of economies around the world. This resulted in Emerging Markets outperforming Developed Markets during the month. Signs of life are starting to appear in pockets of the global economy, with a strong rebound in retail sales across Europe and the U.S. further evidenced by a further 8% rise in Brent crude during June. Continued support from central banks across the world ensures sufficient liquidity is maintained as could be seen by the Bank of England, after increasing its QE programme by a further GBP 100bn.

The top performing shares during June were Microsoft, Prosus and Tractor Supply with the biggest detractors being Pfizer, Anthem and Medtronic on the back of concerns of a second wave of infections in the U.S. Political risks remain, with the upcoming U.S elections in November, tensions between China and the rest of the world and ongoing negotiations between the EU and UK following Brexit. But the biggest focus point will be on the race to find a vaccine and if economies around the world can fully open up.

**FEE STRUCTURE**

TER	Class A1	Class B1
Annual Management Fee (excl. VAT)	1.20%	0.90%
Other Cost		
VAT		
Total Expense Ratio (incl. VAT)		
Transaction Costs (incl. VAT)		
Total Investment Charge (incl. VAT)		

Actual fee structure details will be available 1-year after fund inception.

Foreign Equity	53.0%
Foreign Cash	21.0%
Foreign F-Income	11.6%
Local Cash	10.8%
Foreign Property	3.6%

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs(TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. A list of fund specific risks is provided below. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 30m or 50m depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
