

FUND OBJECTIVE & STRATEGY

The ClucasGray Equity Prescient Fund is a SA only, general equity fund. The Fund aims to provide long term capital growth ahead of its benchmark (SWIX) and the competing unit trust category by investing in any shares that are listed on the JSE. The Fund is a high conviction fund aiming to hold no more than 25 stocks at any one time. Fundamental analysis, a valuation discipline and a belief that inefficient markets create opportunities in mispriced assets underpin our process.

FUND INFORMATION

Table with 2 columns: Portfolio Managers, Inception Date, Fund Size, Unit Price, ASISA Category, Benchmark, Min Lump Sum, Min monthly investment, Issue Date. Values include Andrew Vintcent & Grant Morris, 01 October 2011, R530 million, 179.14 cents, South African Equity General, SWIX Total Return, R20 000, R1 000, 10 February 2021.

WHO SHOULD INVEST

The Fund is suitable for long-term investors seeking high levels of investment growth who can tolerate the associated levels of capital volatility.

RISK INDICATOR

These funds typically exhibit more volatility given their higher exposure to equities which may result in capital losses. Expected potential long-term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

NET PERFORMANCE (ANNUALISED) AT 31 JANUARY 2021

Table with 5 columns: 3-Months, 6-Months, 1-Year, 3-Year, 5-Year, 7-Year, 9-Year, Since Inception. Rows include Fund*, Class A1, Class A2**, SWIX TR, Peer Group.

CALENDAR YEAR PERFORMANCE

Total Investment Charge (incl. VAT)	1.84%	1.38%

MONTHLY COMMENTARY

2021 appears to have started in much the same vein as 2020 ended, with South African equity markets rising strongly in the month. The ClucasGray Equity Prescient Fund gained 3.5% in January, in line with peers, and ahead of the JSE Capped Swix index which gained 3.1%. Over the last quarter, the Fund has now gained over 20%.

During January, numerous key holdings saw their share prices rise appreciably. Long4Life was the stand out performer, gained 28% in the month. As is often the case, the catalyst for this re-rating is not clear, except that the share price in 2020 bore no resemblance to the value we estimated to be embedded in the group structure. Other notable performers in the month included Naspers and Motus which both gained over 10%, while Exxaro, Old Mutual, BHP and Netcare all gained over 7%.

With the rally in many key commodities, the Resources sector has enjoyed a very strong quarter. The Fund has held large weightings in four of the large diversified miners, and we took the opportunity to lighten the exposure into this strength. The proceeds were used to increase weightings in companies that on our analysis are materially mispriced. The Fund has a range of differentiated holdings across the market cap spectrum, and were our investment thesis to play out, we would expect good returns from these holdings.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. A list of fund specific risks is provided below. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
