

**FUND OBJECTIVE & STRATEGY**

The ClucasGray Future Titans Prescient Fund has a flexible mandate to invest in a range of asset classes but will typically have high exposure to companies outside of the Top 40 Index. The fund is permitted to invest 25% offshore plus an additional 5% in Africa. The primary objective of the fund is to achieve real long-term capital growth ahead of CPI + 6%. The fund looks to acquire fast growing, mispriced, mid-and small-cap shares, "Future Titans", on the back of high conviction fundamental investment calls. The fund has a deep value / activist bias.

**FUND INFORMATION**

Portfolio Managers:	Brendon Hubbard, James Clucas
Inception Date:	01 September 2009
Fund Size:	R106 million
Unit Price:	207.38 cents
ASISA Category:	South African - Multi Asset - Flexible
Benchmark:	CPI Upper Limit
Min lump Sum:	R20 000
Min monthly investment:	R1 000
Issue Date:	11 February 2021

**CUMULATIVE VALUE OF R100 INVESTED AT INCEPTION VS BENCHMARK (ILLUSTRATIVE PERFORMANCE)**

Source: Prescient Fund Services

The illustrative investment performance is shown for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

**WHO SHOULD INVEST**

The fund is a high risk, high return fund and should be invested in as a complementary investment to any long-term blue-chip portfolio.

**RISK INDICATOR**

These funds typically exhibit more volatility given their higher exposure to equities and offshore markets where currency fluctuations may result in capital losses. Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

**NET PERFORMANCE (ANNUALISED) AT 31 JANUARY 2021**

Period	Fund	Benchmark	Peer Group
1 month	1.0%	0.5%	2.8%
6 months	15.2%	3.0%	8.0%
12 months	-10.7%	6.0%	-0.2%
3 years, annualised	-5.7%	6.0%	0.3%
5 years, annualised	-3.8%	6.0%	2.1%
Year to Date	-12.9%	6.0%	-0.2%
Percentage positive months	59.1%	100.0%	64.0%
Annualised since inception	6.6%	6.0%	7.4%
Highest rolling 1-year return*	35.0%	6.0%	21.3%
Lowest rolling 1-year return*	-27.1%	6.0%	-13.2%

\*Since inception

**MONTHLY COMMENTARY**

Future Titans was up 1% for January which was disappointing after a strong November and December.

Hulamin was finally granted a reduced import duty rate (15%) for rolled aluminium which affects approximately 50% of production, equating to over R6bn in sales. The full 15% is unlikely to be utilised, as European imports are allowed in duty free, but it does stop predatory pricing by many of the other nations who also have between 9 and 15% duties. Hulamin also announced their order book is almost full with aluminium can demand rocketing on the back of consumer sensitivity to single use plastics. Nampak have previously indicated the shortage in the United States is as much as 10 billion cans which has led them to export empty cans from South Africa. Motus announced an astonishingly good trading update with earnings expected to be between 0% and 5% higher. Motus hit a low of R23.80 in April 2020 and had moved up to R61 by month end relative to our target price of R92. This rebound in vehicle sales has been truly astonishing when you consider the economic mess the world was in middle of last year. The Naamsa export figures also highlight the huge rebound in global vehicle sales with South African January exports of passenger vehicles up 31.8% y-o-y and light commercial vehicles up 71.7% for January 2021. The huge jump in light commercial vehicles is due to the surging demand for last mile delivery vehicles from online shopping. This recovery in volumes will be a significant benefit to Metair. We have seen a number of better than expected updates from SA Inc companies which are driving earnings upgrades and should benefit share prices further.

**FEE STRUCTURE**

TER	Class A1	Class A3
Annual Management Fee (excl. VAT)	1.30%	0.90%
Other Cost	0.12%	0.12%
VAT	0.20%	0.14%

Distribution Date	01 April
Last Distribution (cents per share)	13.26

## DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.
