

**FUND OBJECTIVE & STRATEGY**

The ClucasGray Global Flexible Prescient Fund aims to provide medium to long-term capital and income growth over time by investing in a flexible portfolio of global asset classes and currencies. The Fund will invest in a diversified mix of global assets, including equities, bonds, property, preference shares, debentures, fixed interest securities and money market instruments. The Fund will employ asset and geographical allocations to reflect changing economic and market conditions to maximise returns over the long term.

The illustrative investment performance is shown for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

**PERFORMANCE (NET OF FEES) AT 28 FEBRUARY 2021**

	1 month	6 months	12 months	YTD	Since Inception (Ann)
Fund*	0.2%	-4.5%	5.9%	3.1%	7.4%
Class B1	0.2%	-4.5%	5.9%	3.1%	7.4%
Benchmark	0.7%	-4.1%	7.6%	3.6%	8.6%

**ROLLING 12 MONTH RETURN\*\***

	Highest	Average	Lowest
Fund Class B1	7.8%	1.0%	-4.5%

\* Fund performance is the net weighted average fee return for the fund

\*\* Highest Fee Class

**WHO SHOULD INVEST**

The fund is an ideal wealth creation vehicle for investors with a medium to long-term investment horizon.

**RISK INDICATOR**

These funds typically exhibit more volatility given their higher exposure to equities and offshore markets where currency fluctuations may result in capital losses. Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

**MONTHLY COMMENTARY**

Equity markets moved higher during the month on the on the back of optimism around the start of a global vaccination rollout and confidence that US President Joe Biden's \$1.9tn "Rescue Plan" would be approved. Rising bond yields and a sharp recovery in the oil price points to the fact that market participants are expecting global GDP to recover strongly. In the USA, the Federal Reserve chair, Jay Powell and newly appointed Treasury Secretary, Janet Yellen have both reiterated support toward the US economy. This does give rise to inflation fears, somewhat evidenced by the rise in the US 10-year yield curve. US inflation did rise 1.4% YoY in January. Confidence levels are improving across Europe following the approval of a new Italian government, being led by former ECB president Mario Draghi. Manufacturing PMI numbers also exceeded expectations (57.7), but services PMI numbers remain weak (47.7). The UK economy will also start to gradually reopen from March.

The top performing shares during February were JPMorgan Chase, Citigroup, BHP and Tractor Supply with the biggest detractors being Unilever, Apple and Pfizer. Markets are pricing in a strong recovery in global GDP, coupled with the possibility of more liquidity in the form of monetary and fiscal stimulus and the lack of growth alternatives facing investors, equity markets could prove to be resilient. Inflation should be closely monitored and the potential for a shift from high growth stocks into value and mid-cap plays.

**FEE STRUCTURE**

TER	Class B1
Annual Management Fee (excl. VAT)	0.90%
Other Cost	0.59%
VAT	0.13%

## DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs(TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. A list of fund specific risks is provided below. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
