

FUND OBJECTIVE & STRATEGY

The ClucasGray Future Titans Prescient Fund has a flexible mandate to invest in a range of asset classes but will typically have high exposure to companies outside of the Top 40 Index. The fund is permitted to invest 25% offshore plus an additional 5% in Africa. The primary objective of the fund is to achieve real long-term capital growth ahead of CPI + 6%. The fund looks to acquire fast growing, mispriced, mid-and small-cap shares, "Future Titans", on the back of high conviction fundamental investment calls. The fund has a deep value / activist bias.

FUND INFORMATION

Portfolio Managers:	Brendon Hubbard, James Clucas
Inception Date:	01 September 2009
Fund Size:	R133.8 million
Unit Price:	269.52 cents
ASISA Category:	South African - Multi Asset - Flexible
Benchmark:	CPI Upper Limit
Min lump Sum:	R20 000
Min monthly investment:	R1 000
Issue Date:	07 October 2021

WHO SHOULD INVEST

The fund is a high risk, high return fund and should be invested in as a complementary investment to any long-term blue-chip portfolio.

RISK INDICATOR

These funds typically exhibit more volatility given their higher exposure to equities and offshore markets where currency fluctuations may result in capital losses. Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

Lowest rolling 1-year return*	-27.1%	6.0%	-13.2%

*Since inception

MONTHLY COMMENTARY

Future Titans delivered another strong month. Key to this performance were Metair, PPC and MasterDrilling. The Fund added a small weighting in Nampak where several small events are cumulatively helping to restore the significant value in the group. Nampak aims to sell all the packaging divisions with the exception of the beverage can business. At this point Nampak could become of interest to the large global can producers, such as Ball and Crown, which trade at significant ratings. The Fund also added a global energy ETF as we believe the push into solar and wind power will require significantly more natural gas than is being currently forecast.

Grindrod remains one of the Fund's largest holdings. The hidden gem inside Grindrod is the rail business. Transnet has significant operational problems, which led to them leaving behind 16mt of coal and iron ore from three companies in six months. Transnet also has a very stretched balance sheet, which constrains it from fixing the issues.

Imminent Rail reform will allow private operators to run on Transnet infrastructure for a toll fee in the same way private trucks run on Sanral roads. Transnet had revenue of R44.6bn in 2020 with EBITDA margins of 42%. The EBITDA margins were suppressed by Transnet's wage bill at 30% of revenue. The fuel bill is only 12% of revenue. Private sector operators are likely to achieve EBITDA margins above 50% from which you would need to deduct a Transnet toll fee. Four companies are interested but we believe only two companies have the skills, experience and accreditation to undertake this service. Grindrod is the key listed player, watch this space...

Future Titans met its policy objective for the quarter. Material changes was the selling of ARM, Astral, Distell, Hulamin, Metrofile, Stenprop and RSA 2030, and adding HCI, Sappi, Italtile, Satrx Fini and Pepkor

The current asset allocation for the ClucasGray Future Titans Prescient Fund is as follows:

Fund Asset Allocation	Q2 2021	Q3 2021
Domestic Equity	94%	93%
Offshore Equity	2%	4%
Cash	4%	3%

The number of participatory units as of 30 September 2021 were 56 586 570.

FEE STRUCTURE

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.
